

Where Performance Meets Efficiency.

EUFM SS304 WATER PUMPS

EUFM SS304 WATER PUMPS

technical data

Bore Diameter	150mm (6") or Higher
Power Range	5 HP to 10 HP, Single Phase 5 HP to 50 HP, Three Phase
Head Range	15 Mtrs. to 500 Mtrs.
Flow Range	40 Lpm to 1000 Lpm
Operating Temperature	60° or Higher

key advantages

High Efficiency & Performance

- Stainless Steel Construction: Smooth surface finish reduces frictional losses; higher hydraulic efficiency.
- Conventional Pumps: Rough internal surfaces cause energy loss and lower discharge efficiency.
- Advantage: Better energy efficiency and consistent water output.

Hygiene and Water Quality

- Stainless Steel: Non-reactive and doesn't leach contaminants into the water.
- Conventional Pumps: Rust and scaling can contaminate water, affecting taste and safety.

Lightweight & Compact Design

- Stainless Steel Sheet Metal Pumps: Made using precision sheet fabrication; lighter in weight and easier to handle, install, or transport.
